

Ovens, Microwave and Coffee Machine

A complete range of modern, efficient household appliances: from the Faust maxi oven with its 90 cm width to the practical dimensions of the Elettra Compact oven - barely 36 cm high - the ideal solution for any space-related need is always on hand. **Foster offers modular products that allow for creating coordinated design solutions** by combining **multifunctional ovens** with **microwave+grill ovens**, with multifunctional ovens including the **steam cooking system**, with **coffee machine**, or even with multifunctional **ovens with pyrolysis** self-cleaning (models with 46 cm and 60 cm height and maximum capacity of up to 72 litres).

Efficiency in A class

Foster offers an oven range almost entirely in **A Class**: the top category for energy efficiency. An important result which proves the high quality, targeted to optimize performance and savings.

Energia	
Costruttore Modello	Forno Foster
<small>Norma EN 50304. Direttiva 2002/40/CE relativa all'etichettatura dei forni</small>	

Versatile capacity

Capacity, modularity and flexibility characterize Foster solutions. A complete range in which everyone can find the best desired solution.

Cooking chamber capacity

With a cooking chamber capacity of 72 litres and 6 different cooking levels, Foster ovens top their category for guaranteed capacity featured on a 60x60 cm built-in oven.

XL means that those models feature a capacity exceeding 60 litres.

Modularity

The range of ovens with 46 cm height adds to the traditional 60 cm size with the dual purpose of solving space-related problems and configuring various combinations. The Elettra, Compact and 45 Series solutions are ideal for installation in small spaces, while the 90 cm-wide Faust and KS ovens are the perfect solution for kitchens without any space constraints.

180° reversible opening

In the models with this feature, the door opens fully through 180°. The version supplied by Foster opens on the left but the customer can easily mount the door opening on the right.

Features

Full-Glass door

In many models the inside of the oven door constitutes a single smooth glass surface making it practical for cleaning purposes.

Totally or partially extractable telescopic guides

Most of Foster ovens feature telescopic guides on three levels which improve space distribution and ensure easy and safe extraction of grids and pans.

Easy-Clean enamelling

The Easy-Clean enamelling makes the internal oven surfaces and accessories non-adhesive, while the limited porosity ensures durability and easy cleaning.

Stop Sol glass

The special screening and mirroring treatment of external glass gives the oven an elegant and modern aesthetic. The oven remains dark when not in use, once the illumination is switched on, the inside is perfectly visible.

Thermal insulation and tangential fan

The muffle is carefully designed to provide the appliance's supporting structure with a high degree of insulation. The tangential ventilation, featured in all models, creates a flow of air between the muffle and framework, thereby reducing the temperature of the external surfaces. As consequence, the oven does not expose furniture to temperature shock.

Anti-touch finish

The new ovens are offered with the innovative anti-touch finish which, thanks to its special protection, safeguards the steel surfaces from the annoying fingerprints.

Triple glass cold door

All Foster ovens are equipped with a multiple glass door (up to 3 glasses, 4 for the pyrolytic models). This device ensures low temperatures of external surfaces and lower heat loss.

Fast preheating

This function turns on the heating elements and a flow of hot air raises the temperature to 200°C within a very short time.

Features

Pizza function

The combination of lower-level, ventilated and grill cooking allows for obtaining a crisp, optimally done pizza.

Heat probe

Records the temperature at the core of the product at all times. Once the cooking temperature has been set, the oven signals when the foodstuffs are ready and deactivates the heating elements.

Removable glasses

The glass of the door of the oven can be removed for complete cleaning. In the picture the system of pyrolytic KE: the glass can be removed with a simple "click".

Self-cleaning pyrolysis

S4000 model 7139 043 and KE model 7144 044 come with the Pyrolysis feature, an efficient, automatic cleaning system that guarantees oven cleanliness and saves our time.

Periodically the Pyrolysis self-cleaning can be activated with 3 possible programs, according to the oven degree of dirt.

As soon as you press the Pyrolysis button, the oven door locks and the cooking chamber heats to almost 500°C reducing any cooking residue to fine ash.

Once the self-cleaning cycle has finished, all you have to do is use a damp cloth or sponge to remove the layer of fine ash; no detergent required.

Matching aesthetics

Minimal

Sober and essential lines. The screened oven glass, with its elegant bevelled edge reminds the induction edge. No handle nor control, for a perfectly minimalist aesthetic and ease of cleaning.

Possible matchings:

S4000 ovens - page 285

S4000 induction hobs - page 258

S4000 Mirror hoods - page 328

Metal

The prevalence of stainless steel surfaces and the big metal knob characterize ovens and cooker hobs for valuable aesthetical matchings.

Possible matchings:

KE ovens - page 295

Gas hobs: GK - page 198
S4000 - page 202
KE - page 218
KS - page 224

S4000 hoods - page 326

Professional

The elegant chromed knob harmonizes the aesthetics of a product line designed for professional performance: sturdiness, performance and large dimensions.

Possible matchings:

Ovens: Faust 90 - page 305

Gas hobs: Quadra - page 212
Professionale - page 232

Satin

The new knob with satin finish is the joining element between the new proposals of Elettra gas hobs and ovens.

Possible matchings:

Cooking functions

Multifunctional electric ovens

The wide range of available programs allows Foster ovens to be performing in any situation: from delicate pastry cooking to the meat or pizza intensive ones.

Lower-level cooking

Suitable for heating foodstuffs.

Upper-level cooking

Suitable for cooking particularly delicate foodstuffs and for keeping them warm after cooking

Traditional cooking

The ideal function for all traditional recipes, including bread, cakes and roasts.

Ventilated cooking

The combination of ventilation and circular heating elements allows for cooking different types of foodstuffs together, without mixing aromas and flavours.

Intensive cooking

The upper and lower heating elements and the fan ensure rapid, uniform cooking. Ideal for cooking pizzas, roasts, lasagne and savoury pies.

Energy saving

Programme that ensures limited energy consumption, ideal for heating foodstuffs or for foodstuffs that require delicate, gradual cooking.

Fast preheating

This function turns on the heating elements and a flow of hot air raises the temperature to 200°C within a very short time.

Central grill

Ideal for toasting or cooking small portions au gratin.

Double grill

Heat is generated by the upper grill only: ideal for toasting, cooking au gratin and browning foodstuffs and also suitable for meat, fish and pasta.

Lower-level cooking + grill

To complete static cooking and to cook au gratin simultaneously.

Fan + grill

The combined action of the fan and grill produces rapid and thorough cooking of thick foodstuffs such as poultry.

Thawing

Allows for thawing foodstuffs in one-third of the normal time through uniform distribution of the air at ambient temperature.

Pizza function

The combination of lower-level, ventilated and grill cooking allows for obtaining a crisp, optimally done pizza.

Grill+Spit

The grill and spit combination produces perfect browning of foodstuffs.

Gas ovens

Gas ventilated cooking

The combination of ventilation and heat from the bottom burner allows good performances and uniform cooking.

Gas grill

Heat is generated by a second gas burner on the upper level, functioning without ventilation: ideal for toasting, cooking au gratin and browning foodstuffs and also suitable for meat, fish and pasta.

Electric grill

Heat is generated by the upper grill only: ideal for toasting, cooking au gratin and browning foodstuffs and also suitable for meat, fish and pasta.

S4000

Self-Cooking

Foster ovens are designed to equip a professional kitchen in your own home. Thanks to the extensive recipe menu made available by Self-Cooking technology and the food temperature control by Heat probe (where available), you can turn into a good cook in short time. Furthermore, the wide digital display allows for controlling the process and customizing the final cooking phase to surprise your friends with your recipes. Those who are already expert cooks can create their personal cook book by memorizing the recipes in the oven.

	1 - Bread, pizza bread savoury focaccia bread panzerotti pizza savoury tart		2 - Fish sea bream salmon tuna trout
	3 - Meat pork roast beef roast veal roast pork ribs fillet of beef roast chicken meat loaf kebabs roast turkey		4 - Dessert yogurt biscuits jam tart meringues muffins plum cake souffles apple pie sponge cake

S4000 combi steam oven

The vacuum and low-temperature cooking

The development of S4000 combi steam oven is inspired by professional ovens: this allows to extend the possibilities of cooking to others normally not used at home. First of all, cooking at low temperatures aided by the use of vacuum, which guarantee excellent results in terms of quality, flavor and natural foods.

All the nutrients and flavor of food and condiments are in fact trapped inside the vacuum container, exalting the quality of raw materials and reducing drastically the need for condiments and seasonings to make them tasty.

Vacuum and steam are also revolutionary in terms of convenience and speed of preparation. It is possible to prepare easily storable half-cooked food, which, thanks to the steam will be perfectly regenerated and re-hydrated with a fast final cooking.

STEAM COOKING	FOOD WARMER	PROFESSIONAL COOKING	CONVECTION COOKING	CONVECTION + STEAM	DELICATE COOKING

S4000 combi steam oven functions

S4000 combi steam oven is a top-class product of excellent performances and great flexibility. It can be considered as a **gastronomic oven** thanks to a sophisticated technology deriving from professional solutions. Unlike other products on the market, steam is not complementary to particular recipes, but a complete device ensuring excellent results for all dishes: meat, vegetables, cakes and all leavened precuts.

Inside S4000 combi oven, steam is generated in a special boiler that spreads already saturated steam within the chamber ensuring perfect, tasty cooking at low temperatures. Moreover, unlike what happens in other products, in which steam is generated directly by water on resistance, the food is never in direct contact with water, thus avoiding the loss of important nutrients.

Steam cooking

Particularly recommended for cooking vegetables. Preserves all the foodstuffs' nutritional properties.

Convection cooking

A cooking system that implements hot air.

Food warmer

Suitable for simultaneously warming up multiple foodstuffs in a practical, rapid and cost-efficient way.

Convection + steam

Mixed system that combines the flow of warm air with vapour for obtaining tasty dishes.

Professional cooking

Ideal for all foodstuffs subject to leavening, thanks to the two cooking phases.

Delicate cooking

Ideal for slow cooking of meat, thanks to the temperature controlled by a heat probe.

MICROWAVE COOKING	GRILL	MICROWAVE + GRILL	AUTOMATIC THAWING	PRE-SET PROGRAMMES
				

Microwave oven cooking functions

Also S4000 Micro+grill oven maintains the functions of advanced programming featured on the whole S4000 collection. Four different cooking functions are complemented by the possibility to set personalized programs. The assisted thawing program permits to choose weight and kind of food. A large range of dishes and grids make the use of the grill easy and yield exceptional results.

Microwave oven cooking
Ideal for cooking or rapidly heating vegetables, rice, fish, meat and liquids. Different power levels are available.

Automatic thawing
Allows for thawing foodstuffs by setting the latter's weight and type.

Grill
For rapidly crusting the surface of foodstuffs. Moreover, the Crunch plate provided creates a crusty layer even on the underside of foodstuffs.

Pre-set programmes
A series of programmes can be selected for heating, cooking, thawing or cooking several types of foodstuffs.

Micro+grill cooking
A combined cooking method that is ideal for lasagne, potatoes, roasts and pies.

KE

A new range of ovens that combines high performance with a sober design, carefully studied for ideal matching with the many new cooking proposals.

Country Ovens

Great attention for the colour-matching for the new coloured products. The Country ovens have the same colours of Electra and Ks hobs. They are in fact enamelled and not painted as most of the competing products. This guarantees a perfect colour matching. Furthermore, enamel involves a much higher resistance to scratches and wear and tear.

Telescopic guides: Country ovens have the cooking chamber with smooth walls and can mount telescopic guides, available as accessories.
